Al-Kaafah Crushers facility has the capability to produce different sizes of aggregates, rocks and rock armour as per specific customers' specifications and quantity requirements.

The production process involves a series of specialised stages depending upon which product is to be supplied. Al-Kaafah Crushers have a very small experience in this field which has resulted in our procedures being both efficient and cost effective.

A comprehensive maintenance inspection programme is continually undertaken by our trained workforce in order to ensure that all plant and machinery is kept fully operational at all times to suit our production requirements. The Al-Kaafah Crushers systematic approach to the management of resources and the efficient production of materials is reflected by the constant quality monitoring undertaken by the independent QA/QC Department and Crusher staff.

QUARRY MATERIALS SUPPLY, CRUSHER & SCREENING

The Al-Kaafah product range is categorized as follows: • Aggregates • Sub-base, Road-base & Wet Mix Material • Capillary Breaker & Pervious Backfill
• Rip-Rap & Gabion Rocks • Gabro • Rockery Stones and Landscaping • Dune Sand & Wash Sand

Al-Kaafah Crushers will always remain focused on supplying high quality construction materials, while building strong partnerships with our valued customers, staff and suppliers.
